

Copper Plumbing Tubes

Product Range 2023

SANCO®

Manufacturing Programme and Technical Data

SANCO® is Europe's No. 1 plain copper plumbing tube and can be used in all areas of domestic plumbing.

- in coils of 25 m and 50 m
- in straight lengths of 5 m

Outer diameter x wall thickness (mm)	Copper Weight (kg/m)	Perm. working pressure* (bar)	Water Volume (l/m)	Availability		
				5m lengths	25m coils	50m coils
6 x 1,0**	0,140	229	0,013	•		•
8 x 1,0**	0,196	163	0,028	•		•
10 x 1,0**	0,252	127	0,050	•		•

159 x 3,0	13,085	22	18,385	•		

A close-up photograph of several copper plumbing pipes. The pipes are arranged in a way that creates a sense of depth and perspective, with some in sharp focus and others blurred in the background. The copper has a warm, reddish-gold hue. On the surface of the pipes, there are faint, technical markings and numbers, likely indicating specifications or manufacturing details. The lighting is soft and even, highlighting the metallic texture of the pipes.

SANCO® – Domestic copper plumbing pipes

WICU®

The plastic-covered copper tube is designed for all applications in domestic plumbing, especially where good exterior protection is needed.

- in coils of 25 m
- in straight lengths of 5 m

Outer diameter x wall thickness (mm)	Copper Weight (kg/m)	Perm. working pressure* (bar)	Water Volume (l/m)	TOTAL outer diameter (mm)	Availability 5m lengths	25m coils
6 x 1,0**	0,140	229	0,013	9		•

54 x 1,5	2,202	33	2,043	60	•	

WICU®Flex

The tube is fitted with a flexible PE sheath, which reduces sound transmission as well as condensation and heat losses.

- in coils of 25 m

Outer diameter x wall thickness (mm)	Copper Weight (kg/m)	Perm. working pressure* (bar)	Water Volume (l/m)	TOTAL outer diameter (mm)	Availability 25m coils
12 x 1,0	0,308	90	0,079	24	•
15 x 1,0	0,391	71	0,133	27	•
18 x 1,0	0,475	58	0,201	30	•
22 x 1,0	0,587	47	0,314	34	•

* The max. permissible working pressure was calculated based on annealed copper tubes at $R_m = 200 \text{ N/mm}^2$ and a security value of 4. The max. permissible working pressure applies to the copper tube, not to the tube joints. Other standard specifications on request.

** These sizes are not DVGW-GW 392 approved (technical rules of DVGW).

SANCO® and WICU® are registered trademarks of HME Copper Germany GmbH

The image shows several white, flexible copper pipes. Some are coiled into loops, while others are straight. The ends of the pipes are cut, revealing a bright orange-red copper interior. The pipes are arranged in a way that creates a sense of depth and texture. A white rectangular box is overlaid in the center of the image, containing the text 'WICU® - Copper pipes'.

Art.-No.	min. coating thickness (mm)	max. permissible operating pressure (bar)	Water volume (l/m)
7500755	9	171	0,018
7500757	9	109	0,049
7500759	9	80	0,097
7500754	9	171	0,018
7500756	9	109	0,049
7500758	9	80	0,097
7500760	9	77	0,151
7500762	9	62	0,228
7500761	9	53	0,321
7500763	9	171/109	0,018/0,049
7500764	9	171/80	0,018/0,097
7500765	9	171/77	0,018/0,151
7500766	9	109/77	0,049/0,151

The values of the maximum permissible operating pressure always refer to the material R200 and the respective dimension, calculated with a safety factor of 3.0, according to standard EN 14276:2020, which complies with the European directive PED 2014/68/EU (Pressure Equipment Directive). The minus tolerance of the wall thickness is considered. Further processing is not taken into account. Values valid up to 100°C operating temperature. For operating temperatures \uparrow 100°C up to 250°C the operating pressure has to be recalculated.
